

EARTHCARPET BLUE CARPET BLUEGRASS BLEND

Our best blend of elite Kentucky bluegrasses. Excellent for establishing new lawns or reseeding existing lawns originally established by sod. Winter hardy and disease resistant.

EARTH CARPET HERITAGE PREMIUM LAWN SEED MIXTURE

A top performer, this premium mix of improved Kentucky bluegrasses and turf-type perennial ryegrass established quickly and develops into a thick, beautiful lawn in one growing season. Excellent for starting new lawns or revitalizing existing ones.

EARTHCARPET SHADY PLACE MIXTURE

The ultimate choice for light to dense shade, Shady Place not only grows vigorously in shade, but also adapts to a wide variety of soil types and moisture conditions.

EARTHCARPET CARE-FREE MIXTURE

Perfect for those areas where water and fertilizer conservation is important. Known for surviving under extreme conditions, fine fescues can be found thriving in infertile, dry soils, deep shade and where turf is neglected, tortured and forgotten. Perfect solution for difficult to manage areas.

EARTHCARPET WEAR-N-TEAR MIXTURE

This mixture of tough, vigorous varieties easily withstands the abuse of continual use. The durable carpet of green stand up to summer stress and requires minimal upkeep. Features rhizome forming tall fescues. Excellent for high traffic areas such as backyards and play areas.

EARTHCARPET QUICK-2-GRO MIXTURE

A three-way blend of Kentucky bluegrass, creeping red fescue and perennial ryegrass. Quick-2-Gro Mixture can adapt to a wide range of soil types. An economic mixture offering good value and performance.

EARTHCARPET PRO-SPORTS TURF MIXTURE

Ideal for new seeding or renovating football, soccer, baseball fields and playgrounds, this mix was developed to provide durable, high quality turf on high traffic areas. Superior wear tolerance and excellent winter hardiness.

EARTHCARPET TUFF-STUFF & SURVIVOR TALL FESCUE BLEND

An excellent blend of high endophyte, rhizome-rich turf-type tall fescues. Deep rooted and winter hardy, tall fescues have the ability to access water from deeper soil depths than Kentucky bluegrass or perennial ryegrass. Survivor exhibits good disease and pest resistance that survives on many soil types in full sun or light shade.

EARTHCARPET CHAMPION G.Q. PERENNIAL RYEGRASS BLEND

An Oregon certified blend of top performing perennial ryegrass varieties with high endophyte levels. Formulated especially for use on golf courses and athletic fields, it has the ability to establish quickly and suppress the growth of weeds. G.Q. means "Golf Quality" and is guaranteed to be free of *Poa annua* or *Poa trivialis*. Excellent salt tolerance and gray leaf spot resistance.

EARTHCARPET NATURES CHOICE LAWN MIXTURES

A mixture designed for areas where regular watering is not available. Ideal for those on wells or watering restrictions who cannot maintain more traditional types of lawn grass. This mixture features Ephraim crested wheatgrass, which is known as a deep-rooted and drought tolerant wheatgrass. Ephraim is one of only a few wheatgrass species that propagates through rhizomes.

EARTHCARPET CANADA BLUE FESCUE MIXTURE

A mixture designed for areas where regular watering is not available. Ideal for those on wells or watering restrictions who cannot maintain more traditional types of lawn grass. This mixture features two of the most drought-tolerant cool season grasses, Canada Bluegrass and Blue Fescue.

NATIVE WONDER MIXTURE

A mixture of warm season grasses including Buffalograss and Blue Grama. Native to the Great Plains, these grasses are ideal for those desiring a true native lawn with that "back to nature" look. Very heat and drought tolerant.

PREMIUM IRRIGATED PASTURE MIXTURE

This pasture mix is a formulation of high quality producing and palatable grasses to be used for grazing and or hay production. This combination is designed with cool season grasses that produce well in the Intermountain area as well as the High Plains of the Rocky Mountain region. Use this mix for intensive grazing or for the production of high quality forage.

ECONOMY IRRIGATED PASTURE MIXTURE

This mix is formulated with production in mind. The grasses provided are high yielding and fast growing especially in the spring and fall. Yield is the major objective with this mix either by haying or grazing. Use this mix where water is limited because it includes hardy, drought tolerant grasses.

SMOOTH MEADOW IRRIGATED MIXTURE

The yield and quality of meadow brome combined with the aggressiveness and drought tolerance of smooth brome come together to form this high yielding pasture mix. By combining these two brome grasses with Orchardgrass and Festulolium, this mix will deliver high quality forage with excellent winter hardiness. For use in all soil types, this mix requires irrigation to realize maximum benefits of all grasses.

DRYLAND PASTURE MIXTURE

A mixture of hardy, drought tolerant grasses adapted to the Northern Plains and Intermountain regions. It provides good spring forage and fair regrowth in the fall. Widely adapted to many soil types and elevations of 3,000 to 10,000 feet. Ideal for areas not receiving regular irrigation.

MOUNTAIN MIXTURE

A mixture of grasses adapted to higher elevations. Very good for mountain pasture and meadows as well as soils stabilization for ski slopes and construction sites.

RABBIT EARS PASTURE MIXTURES

FOOTHILLS MIXTURE

A mixture developed for elevations of 3,000 to 8,000 feet to provide natural cover under dryland conditions. Contains both cool and warm season grasses adapted to the Western Great Plains and Southwest regions. Has excellent cold and drought tolerance. Good for soil stabilization on poor soils.

ROCKY MOUNTAIN NATIVE MIXTURE

This mixture was developed for the Rocky Mountain region. It consists of native grasses that include both cool and warm season species. Provides great cold and drought tolerance for the extremes of this region.

LOW GROW MIXTURE

A mixture of low growing (8-12 inches), drought tolerant grasses suitable for areas where mowing is difficult or not desirable. Our wildflower mixes are very compatible with this mix.

MULTI-COLOR HIGH ALTITUDE MIXTURE

A mixture of low growing cool season grasses and native wildflowers. This mix is excellent for areas from 5,000 to 9,000 feet in elevation. Wildflowers will bloom in late spring through the summer and into the fall.
