

## AV120 Brand Alfalfa

AV120 is well known for its long rotation, disease/pest resistance, high yield and adaptability. This fine-stemmed leafy alfalfa has excellent winter hardiness and drought tolerance while still producing high quality forage for improved animal performance. AV20 is suitable for variable soils and climates, and performs well under irrigation.

- Delivers high TDN
- Fast recovery after cutting, good leaf retention
- Highly adaptable to variable soils and climates
- Disease Rating index 24-30    Fall Dormancy 3-4
- **Seeding Rate 15 – 20 lbs/acre**

**Arkansas Valley Seed 4300 Monaco St. Denver, CO 80216**
