

Kentucky Bluegrass

Wild Horse

Product Sheet

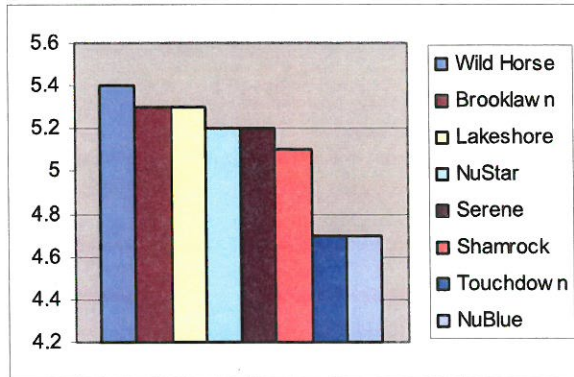

CHARACTERISTICS

Quicken your blends while providing early root structure. At germination tests run at AgriSeed in April 2005, Wild Horse had a 74% germination rate after 10 days compared to Kenblue at 43%, Shamrock at 33%, Famous at 42% and Abbey at 54%.

Wild Horse has done very well in the August 1999 turf trials at Rutgers University in Adelphia, New Jersey. Wild Horse had the highest spring green-up ratings in the trial, taken in April 2003, out of 165 varieties. It showed improved stripe smut resistance and good overall quality for 2000-2003.

TRIAL DATA

2000-2003 Turf Quality Ratings
Rutgers University
Adelphia, New Jersey
1-9; 9 = Ideal Turf

SEEDING RATE

3-4 lbs. per 1,000 square feet for new seeding
1-2 lbs. per 1,000 square feet for overseeding

BENEFITS

- Quick Germination
- Early Spring Green-up
- Good Overall Turf Quality
- Good Stripe Smut Resistance
